To Whom It May Concern

I certify on behalf of Shell GABON that Peschaud Gabon has been our Infield & Rig move Logistics contractor in 2015 and 2016. They provided transportation by river/road and handled equipment and materials for all drilling contractors of the drilling campaign on a 24 hours / day services from/to Port-Gentil and drilling site.

Peschaud performed rig move on lump sum basis in record time with the rig SMP103 without LTI and recordable spills.

Peschaud was involved on ad'hoc basis on additional infield logistic operations and heavy loads activities as they operate their own equipment and Personnel in a very professional way and in full compliance with Shell's QHSE standards.

Peschaud Team always collaborates on constructive way with Shell Gabon Management Team to improve the global Operations / HSE performances.

Their safety record is excellent with no LTI's since they began serving the project.

Should you require more information, please don't hesitate to contact me at D.Hooft@shell.com

Yours truly,
